ICO to help keep Vale of Glamorgan children safe online

Stanwell School in Penarth has joined forces with the Information Commissioner's Office (ICO) to educate children in the Vale of Glamorgan to stay safe online as part of a new national initiative called the 'i in online', which is officially launched on Data Protection Day 2010 (28 January).

The ICO is providing information and advice to pupils at Stanwell School to highlight the risks young people take online and provide guidance on how they can use their personal information safely.

Head teacher, Malcolm Parker at Stanwell said: "We welcome this initiative and want young people to be aware of every aspect of the internet– it can be informative but unfortunately it is not the safe space that many think it is."

Anne Jones, Assistant Commissioner at the ICO said: "Everyday many young people are posting details about themselves online but very few of them are aware that the more information you put online, the greater the risk of it falling into the wrong hands. For example, a date of birth, address and full name would enable fraudsters to steal someone's identity."

"This campaign gives us a unique opportunity to reach an important group of people to provide them with simple, user-friendly advice in a manner and environment familiar to them."

The 'i in online' initiative, spearheaded by law firm Speechly Bircham, provides secondary schools and youth clubs across the UK with free interactive training

sessions developed for staff, parents and children to provide advice on how best to manage online privacy. Many leading media organisations and household names including British Sky Broadcasting; The Walt Disney Company UK; Turner Broadcasting and Nickelodeon are supporting the initiative.

For further information about the 'i in online' campaign visit www.ico.gov.uk

Protecting your identity online – ICO top tips

A blog is for life... remember you risk leaving a permanent electronic footprint. If you don't think you'll want it to exist somewhere in 10 years time, don't post it

Privacy is precious – choose sites that give you plenty of control over who can find your profile and how much information they can see. Read privacy policies and understand how sites will use your details

Personal safety first – don't allow people to work out your 'real life' location e.g. your school. Your personal safety offline could be affected by what you tell people online

Password protected – change your passwords regularly, don't use obvious words like your pet's name and don't use the same passwords on social networking sites as you do for things like internet banking

Address aware – use a separate email address for social networking and one that doesn't give your year of birth or ideally, your full name

Reputation is everything – what seems funny to you and your friends now might be not be to your teachers, university admissions tutor or prospective employer – or to you in years to come

ENDS
